WELL PROVEN FOR DECADES

DOMETIC REFRIGERATORS AND SAFES FOR HEALTH AND CARE FACILITIES

Dometic is a leading manufacturer of cooling appliances for special applications – with decades of experience in the healthcare sector. Our reference list includes hospitals, retirement and nursing homes, doctor's surgeries, pharmacies and laboratories.

Dometic Medical and Food Line refrigerators have been proven thousands of times over, across Europe and beyond. They are among the most compact of their kind available in the market. With its ProSafe range, Dometic also provides a reliable solution for secure storage of the patients' or residents' valuables.

All products for the healthcare sector are manufactured to stringent quality and environmental standards in Dometic's, certified factories. Our sales and service network spans almost 100 countries and provides personal support to customers and planners on all continents.

RESPONSIBILITY FOR THE ENVIRONMENT

At Dometic, thinking and acting ecologically is an all-embracing process that extends to all levels – from the design of resource-saving, energy-efficient products to sustainable production processes and special recycling measures. You can be 100% sure that all applicable regulations, directives and guidelines are fulfilled.

CERTIFIED QUALITY

- All Dometic production plants are certified according to ISO 9001 and ISO 14001 as well as the Eco-Management and Audit Scheme.
- Dometic is an EMAS-certified company. All environmental results are published in Dometic Environmental Product Declarations.
- All products fulfil the requirements of the European Union's ROHS directive.

Dometic's certified production facility at Jászberény, Hungary

DOMETIC PRODUCTS VALUE PROPOSAL

FOR HOSPITALS, RETIREMENT HOMES, SURGERIES AND PHARMACIES

HOSPITALS & CLINICS

Having their own Food Line fridge and ProSafe in the room gives patients peace of mind and comfort while away from home. They are less dependent on staff for drinks and food and can rest assured that their valuables are safely stored. This, in turn, relieves the staff and cuts on operating costs. Hotel-like amenities can also help hospitals and clinics stand out from their competitors. Medical refrigerators on the station floor provide easy access to daily medications and common prescriptions, which means shorter distances to go for the hospital staff.

Product examples: DS 400, HC 302 DIN, DS 301 H and MD 363

RETIREMENT HOMES

Dometic Food Line refrigerators take up very little space and offer a great deal of comfort. They make the residents feel more at home, and more independent too. This relieves the nursing staff and gives them more time for other tasks. Dometic medical refrigerators provide safe storage for temperature-sensitive pharmaceuticals and fast access to "daily essentials".

Product examples: DS 400, HC 302 DIN and MD 363

SURGERIES AND PHARMACIES

Dometic medical refrigerators keep temperature-sensitive pharmaceuticals, preparations and vaccines close at hand for immediate access. They provide safe storage at a temperature between +2°C and +8°C. The well organised, illuminated interior with practical drawers and compartments makes for easy handling.

Product examples: HC 302 DIN, HC 502 DIN and DS 601 H

& FOOD

DOMETIC MEDICAL REFRIGERATORS

THE MOST COMPACT MODELS

The ideal solution for storing heat-sensitive medicine safely at a temperature between +2 °C and +8 °C. Practical drawers enable you to keep the medicine organised and structured. A digital thermometer monitors the internal temperature and stores the highest and lowest temperature for a defined control period.

You can choose between two series with different cooling technologies and quality features:

HC series with powerful, energy saving compressor technology: with integrated temperature display and high-quality, roller based metal drawers (3/4 extension) with plastic front

DS series with noiseless absorption cooling: for normal ambient temperatures, fitted with an external thermometer and plastic drawers (1/2 extension) with transparent front

QUALITY FEATURES

- Constant cooling performance between +2 °C and +8 °C
- DIN certified medical refrigerators
- High-quality metal drawer with telescopic sliders
- Digital temperature display with memory function
- Audible alarm functions
- Lock included

WHY CONVENTIONAL HOUSEHOLD REFRIGERATORS WON'T WORK

Conventional household refrigerators are unsuitable for the storage of insulin, vaccines, heparin products and other heat-sensitive pharmaceuticals. Here are the main reasons why:

- Unable to maintain the required temperature between +2 °C and +8 °C
- Temperature can rise to over +10 °C during defrosting phases
- Temperature data cannot be checked and documented
- Serious health risks for patients
- Liability risks for hospitals

A medical refrigerator keeps you on the safe side.

DS SERIES MEDICAL REFRIGERATORS

NOISELESS ABSORPTION COOLING

Well proven over the last decades, DS series medical refrigerators are ideal for safe storage of insulin and other heat-sensitive pharmaceuticals at a temperature between 2°C and 8°C. The drawers allow for an organised storage of pharmaceuticals. The external digital thermometer keeps the interior temperature under control.

- Noiseless absorption cooling unit
- Fuzzy Logic technology for low power consumption
- Adjustable temperature settings for efficient usability
- LED interior light for user convenience
- Door lock for secure storage
- Drawers with flexible compartments for organized storage

HC SERIES DIN MEDICAL REFRIGERATORS

EXCELLENT STORAGE CONDITIONS FOR HIGHEST DEMANDS

Medical refrigerators have to meet the very highest demands, and they have to be absolutely reliable. To be on the safe side, use equipment that complies with the DIN 58345 standard for pharmaceutical refrigerators, because it will meet the expectations for professional storage to the full extent. In addition to standard features like temperature setting, ventilated cooling and a safety

lock, our DIN certified equipment also provide a visual and audible warning function in case of temperature deviations. Thanks to an integrated battery the warning function (visual + audible) will even be maintained for at least 12 hours if the power supply fails. On top of that, DIN refrigerators are fitted with a potential free contact for alarm transmission.

Complies with DIN 58345 and Ö-Norm K2040

HC SERIES MEDICAL REFRIGERATORS

NON DIN VERSIONS

Based on efficient compressor cooling, HC series medical refrigerators are amazingly powerful and energy-saving. Moreover, the models in the HC series are fitted with some useful extra features. High-quality, roller based metal drawers with 3/4 extension allow for convenient handling in everyday use, and the thermometer is integrated in the door.

- High-performance compressor cooling – even at high ambient temperatures
- Integrated in the door: illuminated thermometer min/max data memory to monitor the interior temperature
- High-quality, roller based metal drawers with 3/4 extension for well organised storage
- Door open alarm

WITH FACTORY PRESET FIXED TEMPERATURE

BREAST MILK REFRIGERATOR

Sensitive breast milk has to be stored at a temperature between +2 °C and + 4 °C to preserve its nutritional value and prevent health risks to the babies. The new MC 302 breast milk cooler provides the optimal storage conditions. A special control system ensures that the factory preset temperature of +2.5 °C is reliably maintained. The current temperature is shown on an external display – no need to open the door to check it. Additionally, any deviation from the admissible temperature range (+1 °C to +4 °C) is signalled by a warning signal.

DOMETIC MC 302

Breast milk refrigerator, right hinged, 22 l

- DIN 58345 compliant
- Keeps heat-sensitive breast milk between +1 °C and +4 °C (factory preset fixed temperature of +2.5 °C)
- Door integrated with multi-functional temperature display.
- Integrated fan for reliably constant temperature
- Features an audible warning system if the door is open for more than 20 s
- Compressor cooling technology
- Convenient, robust slide-out drawers

COMPACT AND SILENT REFRIGERATION FOR FOOD AND MORE

SILENCIO FOOD LINE

Ideal for
Patient In Room
Comfort

Chilled drinks and food right at your fingertips at all times. When there is no room for an household refrigerator, a miniCool in the Food Line series has great benefits. Whether it's for everyday use in hospitals and nursing homes with the shortest possible distances for patients and residents or for a bit of privacy in student accommodation. The Food Line provides totally silent refrigeration without compromising on cooling performance. As the only cooling appliance in this class, the models are suitable for fresh food.

THE DOMETIC FOOD LINE MINI FRIDGE

Unique worldwide. No other noiseless refrigerator reaches an interior temperature of 4°C at up to an ambient temperature of 32°C.

IDEAL FOR:

- Nursing homes
- Hospitals
- Offices/meeting rooms
- At home as an additional refrigerator in the bedroom, living room or children's room
- Student homes/apartments

DS 600 FS/BI

EASY CUSTOMIZING WITH BI MODELS

Designed for built-in use: BI mini fridges are fitted in the factory with a sliding hinge to be fastened to the furniture door to compensate for the differing turning points between the furniture and fridge door. That means the refrigerators can be easily fitted with a front panel to suit your interior design concept.

INSTALLATION TIPS FOR BUILT-IN REFRIGERATORS

THINGS TO NOTE WHEN INSTALLING A BUILT-IN ABSORPTION REFRIGERATOR

- The refrigerator must be placed on a surface that is level in both directions
- There should be 2 cm clearance to the wall
- Ventilation must be provided as shown in the drawings below (A, B, C or D)
- The ventilation duct must at least measure 105 mm x the width of the refrigerator
- The entire cooling unit should protrude into the ventilation duct as shown
- Air passing through the duct must not be warmed up by any source of heat
- Ventilation grills, if used, must have a free opening of at least 200 cm² each

Dometic absorption fridges are equipped with an electrically heated cooling unit which is virtually silent in operation. The heat which the cooling unit extracts from the refrigerator interior is emitted at the back of the fridge. If you have a free-standing model, sufficient ventilation is provided in most cases. If you want to integrate the fridge into a piece of furniture, however, the following instructions need to met.

Please note that there must be sufficient room for ventilation behind the refrigerator to prevent heat build-up. As a rule of thumb, the free ventilation space should be at least 300 cm² for incoming air and at least 200 cm² for outgoing air. The distance from the rear of the refrigerator to the rear wall of the furniture must be at least 2 cm. During installation, make sure that the refrigerator is standing on a stable, level surface, and not directly near a heat source.

COOLFREEZE CFX COMPRESSOR COOLERS

RELIABLE COOLING AND DEEP-FREEZING DOWN TO -22 °C

Excellent cooling and freezing performance, low energy consumption – features you can depend on with each compressor appliance from Dometic. CoolFreeze CFX series coolers are perfectly equipped for safe transport of sensitive food in hospitals and nursing homes. Featuring a specially developed, high-performance compressor and an extra-strong insulation, they consume up to 35% less energy than comparable units.

Fitted with heavy-duty features like reinforced corners, stainless steel hinges and a robust lid lining, the high-tech coolers in the CFX series can withstand the most demanding of loads. Even so, they are remarkably lightweight and easy to transport. All models in the CFX professional series give you the convenient option of controlling and monitoring the cooling temperature by WiFi app.

TEMPERATURE CONTROL VIA WIFI APP

All CoolFreeze CFX coolers can be conveniently controlled by smart-phone. Our WiFi app provides plenty of options. You can set different cooling temperatures, battery protection levels and temperature alarms. Or switch the cooler on and off from a distance.

- ON/OFF switch
- Temperature setting via slider or button
- Programming of battery protection levels and temperature alarms
- Display of current temperature, energy source, voltage and warning messages
- Android and iOS version available

- Suitable for deep freezing down to -22 °C
- Excellent cooling performance even at extremely high outside temperatures
- 12/24 volts DC and 100 – 240 volts AC
- CFX special electronics with digital temperature display
- Extremely efficient and superbly quiet operation
- USB port for charging low-power electronic devices
- Drain plugs make cleaning simple
- Suitable for solar operation
- Heavy-duty design
- Temperature control by WiFi app

SAFETY &

SECURITY

FROM STANDARD TO PREMIUM

THE RANGE OF DOMETIC PROSAFE MODELS

Security is an essential requirement for hotel guests, and one of the main reasons for choosing or discarding a destination and a hotel. The Dometic GROUP, aware of this, is always developing and improving all of its products in order to meet the needs of customers.

The latest product innovation Dometic has launched is a proSafe range which goes one step further in terms of design, functionality, technology and security. This proSafe range has a very modern design with a color display, an illuminated keypad, the latest anti-tampering system and a new website platform which offers the possibility to

operate the safe with the strictest security. The elegant cabinets of the new proSafe generation have rounded corners and edges for enhanced safety. Contemporary design

- Master key
- LED interior light
- iAudit system – unique in the industry
- Remote Emergency Opening System (REOS 2.0)
– ultimate security and user comfort
- Battery level check

PREMIUM CLASS

Excellence in form and function: Dometic innovations like iAudit tracking and the REOS Remote Emergency Opening System ensure security on all levels.

STANDARD CLASS

High security level combined with easy operation for perfect comfort and convenience.

PRODUCT FINDER – THE QUICK WAY TO FIND THE RIGHT PRODUCT

LASER-CUT DOOR

Our doors are precisely cut and crafted by a laser beam. This allows us to achieve 100% accuracy in dimensions and an extremely small clearance between the door and casing, making the door impossible to pry open.

ANTI-TAMPER SYSTEM

With the anti-tampering system, Dometic offers a unique security feature for their models. All anti-tampering manipulation attempts are recorded in the electronic of the safe and can be tracked back at any time.

REOS CODE

REOS stands for Dometic’s Remote Emergency Opening System. The emergency-opening system from Dometic is based on an innovative encoding system. The unique solution combines advanced electronics with state-of-the-art online technology to allow simple yet highly secure emergency opening by authorised hotel staff.

PREMIUM iAUDIT

All operations effected on a safe must be documented – for your own security and for your insurance provider. This is where

Dometic’s Premium iAudit system offers a truly convenient solution: the integrated microchip provides storage capacity for the last 1,000 events.

SAM

The unique Dometic safe managementsystem (SAM) allows for iAudit Trail and one time emergency code generation (REOS) from a user friendly but PIN secured internet based software tool.

SAFE TO SAY IT'S MORE CONVENIENT

PREMIUM CLASS IN-ROOM SAFES

DOMETIC PREMIUM CLASS SAFES

Protection for more privacy – comfortably and with absolute reliability. With a Premium Class proSafe, a hotel room becomes a perfectly private haven for the guest. A safe place for storage, conceived and implemented according to the newest standards. Its innovative and customisable design suits every hotel in a stylish way. Smooth surfaces and rounded edges make it easy to look after and give it long-lasting character. A color display and the integrated soft-touch keypad make operation easy. And a Premium Class proSafe also

breaks new ground when it comes to protective properties: pioneering technology like the unique iAudit and the anti-tampering system ensure security on all levels. The demand for contemporary security systems with added convenience is supported by special features such as REOS 2.0 software with its emergency code-opening system (optional).

- LED interior light
- Laser-cut door and frame
- iAudit for convenient documentation
- Emergency opening with key and master code
- Remote Emergency Opening System (REOS 2.0) – ultimate security and user comfort (optional)

WIDE CHOICE OF MODELS AND SIZES

Dometic ProSafe MD series Premium Class safes are available in various sizes to suit different capacity demands, interior designs and installation conditions. Sizes range from 8.2 to 29 litres.

Batteries included – Dometic safes come ready to use.

Optional inside plug to charge mobile devices.

Automatic opening – Safe door opens automatically.

Fixing kit – Optional fixing kit for secure fastening.

DOMETIC STANDARD CLASS SAFES

ROBUSTLY MADE WITH USER-FRIENDLY FEATURES AND FUNCTIONS

It puts hotel guests' mind at rest to have a safe place for their valuables while travelling. Providing a secure space for important or valuable objects yet it is a distinctive feature when choosing a hotel room or suite. With a Standard Class ProSafe, you can create a reliable spot in a guest room that is worth every penny. Security and functionality are paramount with all Dometic safe models. The Standard Class safe models offer your guests a high level of security thanks to their robust construction. Their simple and intuitive usability provides perfect comfort and convenience.

- Robust and reliable
- LED display
- LED interior light
- Master key and master code emergency opening
- Wide choice: vertical, horizontal, top-opening

DOMETIC PROSAFE MDL – VERTICAL OR HORIZONTAL

MDL 408

MDL 193

With quality and security at their core, these value-for-money in-room safes significantly enhance the security of existing hotel rooms.

- Value-for-money solution for upgrading hotel rooms
- Vertical or horizontal model – both with 18.4 liters capacity
- Easy installation inside a cabinet or on the wall
- Emergency opening with master code or master key
- Battery-low warning alerts users to change battery

DOMETIC PROSAFE MD 310 / 390 / 450 SAFE INVESTMENT

The doors on all the Standard Class safe models are precisely cut and crafted. Their robust construction and a locking system with extra-strong steel bolts leave no point of attack for burglars. The LED interior light minimises the risk of forgotten valuables. Fast and secure emergency opening is possible with a master key or master code (depending on the model).

- Robust, reliable construction for optimal safety
- LED interior light makes the contents visible at a glance
- Emergency opening with master key or master code

DOMETIC PROSAFE MDT TOP-OPENING SAFE

Part of the Dometic Standard Class range, the Dometic ProSafe MDT 400 X top-opening safe provides a simple, yet ingenious solution that is easy to operate and safe to use. The top-opening drawer safe can be integrated in an existing furniture drawer and provides easy access to guests' valuables. At the same time it meets the highest demands on ergonomic design, comfort and security with an LED inside light for standard, master key and master code opening possibility in case of emergency, digital LED illuminated keypad, four-digit code and top-opening stabilizer arm. An audio signal confirms that the safe is securely locked.

- Convenient access from above
- LED interior light makes the contents visible at a glance
- Enough room to fit laptop and tablet computers
- Ideal for installation into existing hotel room drawer
- Stabilizer arm for smooth opening and closing of the lid
